

Green Light

- ✓ Fourteen Automotive System Videos
- ✓ One Sales and Presentation Video
- ✓ Downloadable Workbooks for every Video
- ✓ Average Video is 28 minutes
- ✓ Private Coaching Available
- ✓ Hosted by a Professional LMS Provider

Who Should Complete the Green Light Program?

- ✓ Anyone who wants to begin a career in Automotive Service
- ✓ Anyone who is onboarding into the career
- ✓ Anyone who wants to sharpen their knowledge of complete system diagnosis
- ✓ Anyone who wants to hone communication skills with both the customer and their technicians

Step-by-Step Description

Green Light presents fourteen different vehicle systems

1. Identify the entire system and highlight the major components
2. Define the function of each individual component within the system
3. Detail causes for wear and failure for each component
4. Identify words or phrases the customer may use when explaining symptoms
5. Provide insight to improve communication with the technician
6. Summarize how the components work together within the system
7. Provide Statements of Benefit for use when recommending a repair or service

The format and delivery of information is perfect for everyone. Green Light employs a dynamic hybrid of Active Slide Deck and Full Motion Animation to capture visual attention. Narration is grounded with a music playlist designed to maintain a progressive feel to the learning process. The information is delivered in a story-like format that is easy to understand. The learning experience is timeless because every video has an accompanying downloadable workbook. The dual-purpose workbook will be used to follow along with the video and for a source information for future reference.

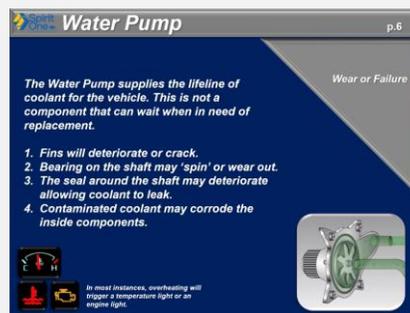

Below is our recommended viewing order. But you can customize your own viewing order.

| | | | | | | |
|----------------------|---|------------|--|--------------------|---|------------|
